

## **Egnyte Launches Builder, an App Store Streamlined for Corporate Productivity**

*Empowering Enterprise Users to Build Their Own Digital Workplace*

**MOUNTAIN VIEW, Calif. - Devember 6, 2016** - Egnyte, leading provider of smart content collaboration and governance for the enterprise, today announced the launch of Builder, an all-new app store that gives users the ability to build their very own secure digital workplace. Builder, live today, lets employees choose their own combinations of best-in-class business applications to increase productivity, while their organization can maintain a high level of security for their content.

“Enterprise employees today are highly diverse in terms of the applications they use to get their work done, which makes it extremely difficult for IT departments as they struggle to build a secure ecosystem that will allow for individual customization,” said Ronen Vengosh, at Egnyte. “Builder, which integrates our Egnyte Connect solution with the most popular business applications on the market today, delivers security and control that IT needs while providing employees the ability to work with the applications they want. This level of secure openness is foundational to our partner ecosystem and unlocks value for both IT and employees.”

In order to launch Builder, Egnyte has focused on doubling its list of partner integrations over the past year with the enterprise’s most in-demand productivity applications, such as:

**AdobeSign:** Users can send documents for signature directly from Egnyte Connect and then automatically store the signed documents right back into Egnyte Connect.

**GoogleDocs:** Users can create, access, and co-edit Google Docs directly from within Egnyte Connect interface.

**Office 365:** Users can open, co-edit and share Office documents directly from within Egnyte Connect on their desktop and mobile devices.

**OneLogin:** IT can manage user identities, provision new users and secure their content using OneLogin.

**Salesforce:** Users can access all their relevant content from Egnyte Connect directly from within the Salesforce interface.

“While creating integrations is important to the success of our business, adoption of those integrations is even more impactful,” said Juan Menendez, SVP of Sales and Business Development at MxHero. “We are very excited to be a part of the new Builder from Egnyte as it creates a seamless experience for users to access and deploy our solution, helping raise our visibility and facilitate a meaningful increase in adoption.”

In addition, Egnyte's new Builder also includes industry and job-specific integrations with partners like Autodesk Forge, FloQast, FotoIn, InMotion, NewForma, PlanGrid, and more.

"In construction, time is money and meeting deadlines is critical," said Abhik Pramanik, Senior Product Manager at PlanGrid, "Egnyte's new Builder will help our customers quickly access and easily deploy PlanGrid, as well as any other business applications they rely on to complete projects."
